

Route V_USB from Teensy to LiPo charger
Power switch on VIN to Teensy

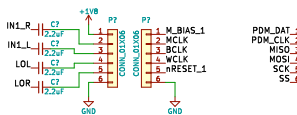

All unused pins will also be broken out and accessible
<https://www.pjrc.com/teensy/schematic.html>

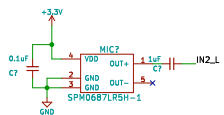

PROGRAM is already connected to push button pull-down on the Teensy

ON/OFF can float or have a pushbutton to GND
Force the chip off (press for 4-5 seconds) then on again (press for 1-2 seconds)
<https://forum.pircc.com/threads/57207-Teensy-4-0-Program-and-On-Off-pins>

Same pin out and orientation as Rev D
for compatibility with Shields

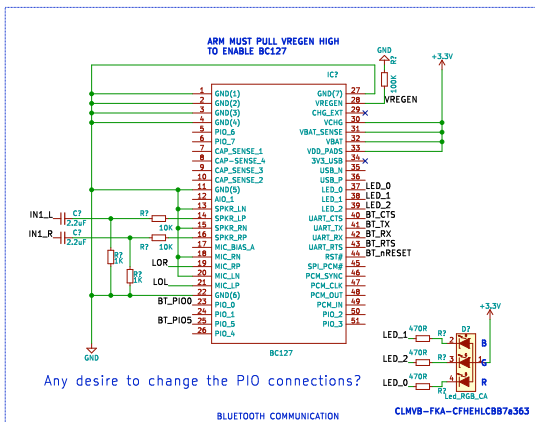

LINE IN/OUT & BREAKOUT

MICROPHONE

DO NOT WASH BOARD AFTER REFLOW

Any desire to change the PIO connections?
